

MATERIAL SAFETY DATA SHEET  
TUSCANY GRAPE

MIO

Current revision date: 03/04/2024

Current revision number: 00

Previous revision date: --/--/----

Previous revision number: --

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

## 1.1 Product identifier

Commercial name : TUSCANY GRAPE  
 UFI : 1XCO-POMP-E00V-09W6  
 European product categorisation system (EuPCS): PC-AIR-4 - Air care products for vehicles

## 1.2 Relevant identified uses of the substance or mixture and uses advised against

Uses	CONSUMER	PROFESSIONAL	INDUSTRIAL
	EVA air freshener for small rooms		

Uses advises against : All those not expressly identified on the label  
 Life cycle stages : C-Consumer use

## 1.3 Details of the supplier of the safety data sheet

**1.3.1 Manufacturer in the European Union**  
 Joy Fragrances s.r.l.  
 Via Gavinana, 14 - 21052 BUSTO ARSIZIO (VA) – Italy  
 tel. +39 0331 536942 - [www.mrandmrsfragrance.com](http://www.mrandmrsfragrance.com)  
 email competent person [info@joyfragrances.it](mailto:info@joyfragrances.it)

**1.3.2 Importer in the Swiss community**  
 Supair-Tel AG  
 Europastrasse 30 CH-8152 Glatbrugg  
 Tel. +41 448721616

## 1.4 Emergency telephone number

Joy Fragrances s.r.l. - Tel +39 +39 0331 536942 – from 09,30 to 12,30 – from 15,30 to 19,30

## SECTION 2: Hazards identification

## 2.1 Classification of the substance or mixture

## 2.1.1 Classification in accordance with Regulation (EC) No 1272/2008:

The product is classified as dangerous pursuant to the provisions of Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and adjustments), the product therefore requires a safety data sheet compliant with the provisions of Regulation (EU) 2020/878.

Hazard pictogram(s) : GHS07  
 Hazard Class and Notes Category Code(s) : Skin. Sens. 1B, Aquatic Chronic 3  
 Hazard statement Code(s) : H317 - May cause an allergic skin reaction.  
 H412 - Harmful to aquatic life with long lasting effects

## 2.1.2 Adverse Effects

The product, if brought into contact with the skin, may cause skin sensitization. The product is dangerous for the environment as it is harmful to aquatic organisms with long lasting effects.

## 2.2 Label elements

## 2.2.1 Label in accordance with Regulation (EC) No 1272/2008

Hazard pictogram(s) : GHS07

Signal Word Code(s) : WARNING  
 Hazard statement Code(s) : H317 - May cause an allergic skin reaction.  
 H412 - Harmful to aquatic life with long lasting effects  
 Suppl. Hazard statement Code(s) : Not applicable  
 Precautionary statements :

## General

P101 - If medical advice is needed, have product container or label at hand.  
 P102 - Keep out of reach of children.

## Prevention

P280 - Wear protective gloves.

## Response

P333+P313 - If skin irritation or rash occurs: Get medical advice/attention.

## Disposal

P501 - Dispose of contents/container in accordance with local/ national regulation.

Contains: Linalool, Limonene, Trans-2-hexenol, Linalyl acetate, Nopyl acetate, Geraniol, 2,4-dimethyl-3-cyclohexene carboxaldehyde, Ethyl methylphenylglycidate, Hexyl cinnamal, Nerol, Neryl acetate, Allyl caproate.

## 2.2.2 Additional regulations to be implemented on the label

Regulation (EC) 648/2004 : Not applicable  
 Regulation (EU) 528/2012 : Not applicable

**Additional information:** Not a toy. Do not swallow. Do not leave the product exposed in environments with temperatures above 70°C. Do not use the product for purposes other than those intended. Only insert into the air vents. Avoid contact with shiny or metallic surfaces.

## 2.3 Other hazards

The mixture does NOT contain PBT / vPvB substances according to Regulation (EC) 1907/2006, annex XIII in concentrations equal to or greater than 0.1% by weight.  
 The mixture does NOT contain substances that have been included in the list established in accordance with Article 59, paragraph 1 due to properties of interference with the endocrine system in concentrations equal to or greater than 0.1% by weight.

The mixture does NOT contain a substance identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations equal to or greater than 0.1% by weight.

ISO 8317\_ Child-resistant packaging - Requirements and testing procedures for reclosable packages

EN 862\_ Child-resistant packaging - Requirements and testing procedures for non-reclosable packages for non-pharmaceutical products

Not applicable

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

First aid instructions categorized according to relevant routes of exposure. It is advisable for those who provide first aid to wear the personal protective equipment deemed suitable for the conditions in which the intervention is to be carried out.

#### Inhalation

Given the specificity of the product and the small quantities of substances released, conditions such as to require first aid measures are not foreseen.

#### Skin

Wash the areas of the body that have come into contact with the product with plenty of soap and water, even if they are only suspected.

#### Eyes

Given the particular structure of the product, accidental contacts are unpredictable and mainly of traumatic and/or voluntary origin. If necessary, apply fresh compresses and, if the painful phenomena continue, contact the medical staff.

#### Ingestion

SEEK MEDICAL ATTENTION IMMEDIATELY.

### 4.2 Most important symptoms and effects, both acute and delayed

#### Inhalation

They are not known and there are no specific reports on symptoms and effects caused by the product.

#### Skin

They are not known and there are no specific reports on symptoms and effects caused by the product.

#### Eyes

Redness.

#### Ingestion

They are not known and there are no specific reports on symptoms and effects caused by the product.

### 4.3 Indication of any immediate medical attention and special treatment needed

See section 4.1 Description of first aid measures.

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

**Suitable extinguishing media :** Water spray, CO<sub>2</sub>, alcohol resistant foam, chemical powders depending on the materials involved in the fire.

**Unsuitable extinguishing media :** None in particular

### 5.2 Special hazards arising from the substance or mixture

During combustion, fumes that are potentially harmful to health may develop. If exposed to flame, it catches fire and continues to burn with a dimly lit flame even if removed from the heat source.

### 5.3 Advice for firefighters

Use protective clothing for the respiratory tract, eyes and skin. Water spray can be used to disperse vapors and protect people engaged in firefighting. It is also advisable to use self-contained breathing apparatus, especially if you work in closed and poorly ventilated places. Wear the specific protective equipment of the firefighting team. Given the polymeric characteristic of the material, the possible presence of considerable quantities of product in the environments involved in the fire can be a source of risk in causing the re-ignition of the

<div>Mr&amp;Mrs</div> <div>FRAGRANCE</div>	MATERIAL SAFETY DATA SHEET		MIO
	TUSCANY GRAPE		
Current revision date: 03/04/2024	Current revision number: 00	Previous revision date: --/--/----	Previous revision number: --

fire in the presence of oxygen since the internal layers can conserve heat. It is therefore necessary, in the event of a fire in environments where large quantities of product have been involved, to dissipate the heat retained inside.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

**For non-emergency personnel** : Move away from the area surrounding the spill or release. Not smoking.

**For emergency responders** : General information: No smoking. Use suitable personal protective equipment, see Section 8.

### 6.2 Environmental precautions

Contain leaks with inert material. Avoid dispersion and/or washout in sewers and surface waters. Dispose of the residue according to current regulations.

### 6.3 Methods and material for containment and cleaning up

#### 6.3.1 Appropriate advice shall be provided on how to contain a spill

Keep dry.

#### 6.3.2 Appropriate advice shall be provided on how to clean-up a spill

After collection, wash the affected area and materials with plenty of water and recover the resulting fluids.

#### 6.3.3 Any other information shall be provided relating to spills and releases, including advice on inappropriate containment or clean-up techniques

Hand over waste only to specialized companies

### 6.4 Reference to other sections

Refer to sections 8 and 13 for more information

## SECTION 7: Handling and storage

### 7.1 Precautions for safe handling

Normal precautions for handling sensitizing chemical products, protecting themselves from any accidental contact. Do not smoke, eat or drink while handling.

### 7.2 Conditions for safe storage, including any incompatibilities

How to manage risks associated with:

i) explosive atmospheres	Nothing to report
ii) corrosive conditions	Nothing to report
iii) flammability hazards	Nothing to report
iv) incompatible substances or mixtures	Avoid contact with solvents which could damage the product.
v) evaporative conditions	Keep in the original packaging, in well-ventilated areas at room temperature.
vi) potential ignition sources (including electrical equipment)	Keep away from open flames, sparks and sources of ignition in general. Appropriate maintenance of all the electrical components of machines, systems and electrical installations in general can give a sufficient guarantee of reducing the risk of fire.

How to control the effects of:

i) weather conditions	Store indoors in dry environments.
ii) ambient pressure	Nothing to report
iii) Temperature	Store at room temperature
iv) sunlight	Do not store in direct sunlight.
v) humidity	Keep away from humidity.
vi) Vibration	Nothing to report

How to maintain the integrity of the substance or mixture by the use of:

i) stabilisers	Nothing to report
ii) antioxidants	Nothing to report

Other advice including

i) ventilation requirements	Keep in cool and ventilated places.
ii) specific designs for storage rooms or vessels (including retention walls and ventilation)	Nothing to report
iii) quantity limits under storage conditions (if relevant)	Keep in cool and ventilated places.
iv) packaging compatibilities	Nothing to report
v) Storage class	CS 11/13

### 7.3 Specific end use(s)

Consumer: Follow the instructions given on the label/box/information leaflets.

## SECTION 8: Exposure controls/personal protection

### 8.1 Control parameters

## 8.2 Exposure controls

### 8.2.1 Appropriate engineering controls

If, following the risk assessment and the adoption of preventive technical and/or organizational collective protection measures, it appears that there is still a residual risk for the worker, it is necessary to equip the worker with Personal Protective Equipment. In any company, however, the instructions given by the Head of the Prevention and Protection Service must be complied with, who will have assessed the risk deriving from all the products used in each working phase. Before choosing the PPE to wear, it is essential to know the risks associated with the work environment, the environmental conditions, the job of the wearer and after having consulted the instructions provided by the manufacturer. All PPE belonging to the third category must be delivered to operators only after adequate training.

The use of this mixture does not imply the application of Directive 2004/37 / EC on the protection of workers against the risks deriving from exposure to carcinogens or mutagens at work.

**Descriptor for Process categories:** PROC19 - Manual activities involving hand contact

### 8.2.2 Individual protection measures, such as personal protective equipment

The information below must be considered only as an aid to the Head of the Prevention and Protection Service as in addition to this mixture he will have to implement the choices on PPE also in consideration of the other chemical products present in the company used in each specific working phase.

<div>Mr&amp;Mrs</div> <div>FRAGRANCE</div>	MATERIAL SAFETY DATA SHEET		MIO
	TUSCANY GRAPE		
Current revision date: 03/04/2024	Current revision number: 00	Previous revision date: --/--/----	Previous revision number: --

## a) EYE/FACE PROTECTION

PITTOGRAM	PPE	METHOD OF CHOOSING THE PPE				
 Eye and face protection devices	PPE for the eyes are second category and must be provided with indelible CE marking and the number of the Notified Body that issued the certification. Their use is foreseen in all places where there is a risk of projections of solid bodies, liquids or optical radiation. For eyeglass wearers, it is possible to use over glasses if the duration of use is limited or to mount graduated lenses on safety frames. Operators wearing contact lenses must make their condition known in order to make it easier, if necessary, to remove them by first aid workers in case of need in an emergency. Standard EN166 Personal eye protection - Specifications	RISK CHARACTERISTICS	PROTECTION			
			Eyeglasses	Glasses with side shields	Mask glasses	Face shield
		Frontal sketches	Good	Good	Excellent	Excellent
		Side sketches	Scarso	Good	Excellent	Good / Excellent
		Frontal splinters	Excellent	Good	Excellent	Excellent if of adequate thickness
		Side impacts	Scant	Fairly good	Excellent	It depends on the length
		Neck and face protection	Scant	Scant	Scant	Fairly good
		Wearability	Good / Very good	Good	Fairly good	Good (for short periods)
		Continuous use	Very good	Very good	Fairly good	Fairly good
		Acceptability for use	Very good	Good	Scant	Fairly good

The Head of the Prevention and Protection Service will assess the need to provide eyewash devices near the areas where the mixture is used.

## IN NORMAL USE THERE ARE NO PERSONAL PROTECTIVE EQUIPMENT PROVIDED

## b) SKIN PROTECTION

## i) Hand protection

PITTOGRAM		PPE		METHOD OF CHOOSING THE PPE			
  Gloves	<p>The choice of gloves depends on the worker's job, the characteristics of the glove and its biocompatibility. The "grip" must always be guaranteed. The general requirements for choosing the most suitable PPE are: harmlessness, ergonomics / comfort, dexterity, transmission and absorption of water vapor and cleaning. Regarding these requirements, the reference technical standard is UNI EN 420 - Protective gloves. General requirements and test methods. Gloves that protect against chemicals are regulated by EN374 - Protective gloves against chemicals and microorganisms. The basic requirements for this type of gloves are: penetration and permeation. Chemical protective gloves are divided into three categories: Type A, B and C; the belonging to which depends on the number of chemicals tested, from a list of 18 substances that have reached a defined permeation time. Gloves must be checked before use. The choice of gloves based on resistance must be made following the UNI EN 16523 standard - Determination of the resistance of materials to the permeation of chemical products. Use proper technique to remove gloves avoiding skin contact with the contaminated outer surface of the glove.</p> <p>After use, wash and dry your hands.</p>	CHEMICAL PROTECTION					
		Type	Level	Time	Substances		
		A	2	30 minutes	minimum 6		
		B	2	30 minutes	minimum 3		
		C	1	10 minutes	minimum 1		
		MATERIALS FOR PROTECTION FROM CHEMICAL AGENTS					
			LATEX	NEOPRENE	NITRILE	PVC	
		Highlights	Excellent flexibility and tear resistance	Polyvalent chemical resistance: acids, aliphatic solvents. Good resistance to sunlight and ozone.	Excellent resistance to abrasion and perforation. Excellent resistance to hydrocarbon derivatives	Good resistance to acids and bases	
		Precautions	It can cause allergic reactions. Avoid contact with fatty oils and hydrocarbon derivatives.	Avoid contact with fatty oils and hydrocarbon derivatives	Avoid contact with solvents containing ketones and oxidizing acids, organic nitrogen products.	Weak mechanical resistance. Avoid contact with solvents containing ketones and aromatic solvents	

The Head of the Prevention and Protection Service will evaluate the choice of PPE to be used based on the duties.

## USE WATERPROOF GLOVES

## ii) other

PITTOGRAM		PPE		METHOD OF CHOOSING THE PPE			
  Work clothing	PPE for the body can be of different categories depending on their specific use. Under normal working conditions, normal work clothing offers characteristics that provide sufficient protection for workers. In activities presenting particular risks, specific “protective clothing” should be used which covers or replaces personal clothing and which is designed with specific protective characteristics. The basic requirements relating to the ergonomics and health of PPE for the body are: harmlessness of the materials, comfort and effectiveness factors, design, thermal resistance of the clothing and the characteristics of the operators. Please note that to ensure adequacy and mobility with full-coverage protective clothing, it is recommended that all operators carry out the "seven movements" test. Standard EN 13688 Protective clothing - General requirements	DANGER	Full coverage garment		Partial coverage garment		
			Waterproof	Permeable to air	Waterproof	Permeable to air	
		Gas and fumes	A	NO	NO	NO	
		Jets of liquids	A	NO	P	NO	
		Splashes and splashes	A	P	P	P	
		Dust	A	A	P	P	
		Dirt	A	A	A	A	
		NO: Indicates that the possibility is not compatible - A: suitable combination - P: combination that depends on external conditions					
The protective clothing against chemicals, depending on the barrier performance of the raw material used and the packaging of the garment, have different types of protection: Type 1 (gas-tight), Type 2 (non-watertight gas), Type 3 (liquid tight), Type 4 (splash tight), Type 5 (dust tight), Type 6 (limited liquid splash tight). The chemical risks are many and it is therefore necessary to choose the most appropriate garment, also considering that the materials can be both waterproof and permeable, evaluating the combination between the type of protection offered by the construction techniques and the design adopted for the realization of the garment. itself and the performance class from the raw material.							

If the Head of the Prevention and Protection Service deems it necessary, protective clothing can be worn in combination with an appropriate respiratory protection device and with boots, gloves or other means of protection.

## NO PERSONAL PROTECTIVE EQUIPMENT IS REQUIRED IN NORMAL USE

## c) RESPIRATORY PROTECTION

PITTOGRAM	PPE	METHOD OF CHOOSING THE PPE				
 RPD (Respiratory protective devices)	<p>PPE for respiratory protection are of the third category and must be provided with CE marking, the number of the Notified Body that issued the certification and must be provided only after information, training and specific training on their use. To define the type of RPD to use, pay attention to the oxygen rate present in the workplace, using the O<sub>2</sub> concentration of 17% as a limit. Carefully define the type of contaminant (Gas, steam / Dust, particles, viruses), its detection threshold and its use or not in a confined space.</p> <p>The UNI EN 529 standard (Respiratory protection devices - Recommendations for selection, use, care and maintenance - Guidance document) establishing the appropriate FPO value "operational protection factor" (eg use of face masks as per standard UNI EN149 - Respiratory</p>	DUST FILTERS				
		Efficiency	Dust class	RPD class and marking	Minimum total filtering efficiency	Protection
		LOW	Filters P1	Respirators FFP1	78%	Powders/Harmful aerosol
		AVERAGE	Filters P2	Respirators FFP2	92%	Powders/fumes/ low toxicity aerosol
		HIGH	Filters P3	Respirators FFP3	98%	Powders/fumes / Harmful aerosol
		GAS FILTERS				
		Capacity	Class	Maximum concentration		
		Low	1	Gas / vapor concentrations up to 1000 ppm

	Freedom of movement	Reduction of weight and discomfort	Full face + P1		50	30
	Facial anatomy	Mask adequacy	Full face + P2		5	4
Environmental conditions		Full face + P3		20	15	
				1000	400	

The Head of the Prevention and Protection Service, as well as correctly defining the specific PPE for the activities, must pay attention to follow the instructions provided by the manufacturers of the various PPE.

#### NO PERSONAL PROTECTIVE EQUIPMENT IS REQUIRED IN NORMAL USE

##### d) THERMAL HAZARDS

PITTOGRAM	PPE	OBSERVATIONS
 <p>Hot/Cold</p>	<p>The indications provided in this section define the PPE intended to protect against possible temperature variations that the mixture causes or that the mixture itself may undergo during normal working activities. PPE must protect against excesses in external temperature by maintaining body temperature, thermally insulate while maintaining permeability to water and air to ensure sweating and moisture removal, respectively, so as not to cause heat loss. In order to protect themselves from the cold, PPE must retain a degree of flexibility that allows the operator to perform the necessary actions and to assume certain positions. PPE intended for short-term interventions or likely to receive projections of hot products, must have a calorific capacity sufficient to return most of the stored heat only after the user has removed them.</p>	<p>PPE intended to protect against thermal differences must have an adequate heat flow transmission coefficient to avoid any risk of damage as required by the foreseeable conditions of use.</p> <p>The heat flow transmitted to the operator during the use of PPE must be such that its accumulation does not in any case reach the pain threshold or the one in which any harmful effect on health occurs. PPE must prevent, as far as possible, the penetration of liquids and must not cause injury caused by contact between their protective coating and the operator.</p>

The choice of this type of PPE must be made by guaranteeing thermal insulation power and mechanical and chemical resistance adequate to the foreseeable conditions of use that the Head of the Prevention and Protection Service deems necessary.

#### THE MIXTURE IS NOT EXPECTED TO CAUSE OR UNDERTAKE SIGNIFICANT TEMPERATURE CHANGES DURING THE INTENDED USE.

#### 8.2.3 Environmental exposure controls

Prevent uncontrolled release into the environment.

### SECTION 9: Physical and chemical properties

#### 9.1 Information on basic physical and chemical properties

The physical and chemical properties listed below are not to be considered technical specifications. The reference specifications are shown in the technical documentation.

Physical and chemical properties		Value	Notes or analytical method
a)	Physical state	Solid	As defined in Annex I, section 1.0 of Reg. 1272/2008
b)	Colour	Various colours	--
c)	Odour	Characteristic of the fragrance	--
d)	Melting point/freezing point	Not determined	--
e)	Boiling point or initial boiling point and boiling range	Not determined	--
f)	Flammability	NO	Applicable to gases, liquids and solids
g)	Lower and upper explosion limit	Not applicable	Not applicable to solids
h)	Flash point	Not applicable	Does not apply to gases, aerosols and solids
i)	Auto-ignition temperature	Not applicable	Only applicable to gases and liquids
j)	Decomposition temperature	Not applicable	Only applicable to self-reactive substances and mixtures, organic peroxides and other substances and mixtures which may decompose.
k)	pH	Not applicable	The mixture is not soluble in water
l)	Kinematic viscosity	Not applicable	Applies to liquids only
m)	Solubility	Insoluble in water, partially soluble in alcohol	--
n)	Partition coefficient n-octanol/water (log value)	Not applicable	It does not apply to inorganic and ionic liquids and, as a rule, does not apply to mixtures
o)	Vapour pressure	Not determined	According to the REACH regulation, the study must not be conducted if the melting point is above 300°C (Annex VII, column 2 adaptation).
p)	Density and/or relative density	Not applicable	only applies to liquids and solids.
q)	Relative vapour density	Not applicable	only applies to gases and liquids.
r)	Particle characteristics	Not relevant. Non-particulate blend	applies only to solids

#### 9.2 Other information

a)	Explosives:	Not applicable
b)	Flammable gases:	Not applicable
c)	Aerosols:	Not applicable
d)	Oxidising gases:	Not applicable
e)	Gases under pressure:	Not applicable
f)	Flammable liquids:	Not applicable
g)	Flammable solids:	Not applicable
h)	Self-reactive substances and mixtures:	Not applicable
i)	Pyrophoric liquids:	Not applicable
j)	Pyrophoric solids:	Not applicable
k)	Self-heating substances and mixtures:	Not applicable

<div>Mr&amp;Mrs</div> <div>FRAGRANCE</div>	MATERIAL SAFETY DATA SHEET		MIO
	TUSCANY GRAPE		
Current revision date: 03/04/2024	Current revision number: 00	Previous revision date: --/--/----	Previous revision number: --

l) Substances and mixtures, which emit flammable gases in contact with water:	Not applicable
m) Oxidising liquids:	Not applicable
n) Oxidizing solids:	Not applicable
o) Organic peroxides:	Not applicable
p) Corrosive to metals:	Not applicable
q) Desensitised explosives:	Not applicable

### 9.2.2 Other safety characteristics

a) mechanical sensitivity	:	Not applicable
b) self-accelerating polymerisation temperature	:	Not applicable
c) formation of explosible dust/air mixtures	:	Not applicable
d) acid/alkaline reserve	:	Not applicable
e) evaporation rate	:	Non applicable
f) miscibility	:	Not miscible with water
g) conductivity	:	Not applicable
h) corrosiveness	:	Not applicable
i) gas group	:	Not applicable
j) redox potential	:	Not applicable
k) radical formation potential	:	Not applicable
l) photocatalytic properties	:	Not applicable

Other physical and chemical parameters:

COV (Directive 2010/75 / EC) : not available

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

Stable under normal conditions of use and storage.

### 10.2 Chemical stability

Stable under normal conditions of use and storage.

### 10.3 Possibility of hazardous reactions

None known under normal conditions of use.

### 10.4 Conditions to avoid

a) Temperature	:	do not subject to direct heating
b) Pressure	:	nothing to report
c) Light	:	nothing to report
d) Static discharge	:	nothing to report
e) Vibrations	:	nothing to report
f) Other physical stresses	:	no other data available

### 10.5 Incompatible materials

a) Water	:	avoid contact
b) Air	:	nothing to report
c) Acids	:	avoid contact
d) Bases	:	avoid contact
e) Oxidising agents	:	avoid contact
f) Reducing agents	:	avoid contact
g) Chemicals	:	avoid contact

### 10.6 Hazardous decomposition products

Under normal conditions the preparation does not decompose. Due to thermal decomposition, fumes harmful to health are released.

## SECTION 11: Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Hazard classes		Information
a)	acute toxicity	Not classified. based on available data, the classification criteria are not met.
b)	skin corrosion/irritation	Not classified. based on available data, the classification criteria are not met.
c)	serious eye damage/irritation	Not classified. based on available data, the classification criteria are not met.
d)	respiratory or skin sensitisation	The product, if brought into contact with the skin, may cause skin sensitization.
e)	germ cell mutagenicity	Not classified. based on available data, the classification criteria are not met.
f)	Carcinogenicity	Not classified. based on available data, the classification criteria are not met.
g)	reproductive toxicity	Not classified. based on available data, the classification criteria are not met.
h)	STOT-single exposure	Not classified. based on available data, the classification criteria are not met.
i)	STOT-repeated exposure	Not classified. based on available data, the classification criteria are not met.
j)	aspiration hazard	Not classified. based on available data, the classification criteria are not met.

### Specific toxicological information for the substances contained (if available)

Substance:	Linalool; 3,7-dimethyl-1,6-octadien-3-ol; dl-linalool			
CAS:	78-70-6			
ORAL		INHALATION	DERMAL	NOTES
Mouse LD50: 2 200 mg/kg bw		Mouse LC50: > 3.2 mg/L (3200 mg/m³)	Rabbi LD50: 5 610 mg/kg bw	- -
The values entered in this section are those available, at the time of writing this SDS, in the ECHA dossier in the Toxicological information section or from the supplier's indications.				
EXPOSURE AND HEALTH EFFECTS				
Routes of exposure		The substance can be absorbed into the body by inhalation of its aerosol and by ingestion		
Inhalation risk		No indication can be given about the rate in which a harmful concentration of this substance in the air is reached on evaporation at 20 ° C.		
Effects of short-term exposure		The substance is irritating to the eyes and skin.		
Effects of long-term or repeated exposure		The substance may have effects on the liver.		
SYMPTOMS BY SPECIFIC ROUTE OF EXPOSURE				
Inhalation	- -			
Skin	Redness. Ache.			

<div>Mr&amp;Mrs</div> <div>FRAGRANCE</div>	MATERIAL SAFETY DATA SHEET		MIO
	TUSCANY GRAPE		
Current revision date: 03/04/2024	Current revision number: 00	Previous revision date: --/--/----	Previous revision number: --

<b>Eyes</b>	Redness. Ache.
<b>Ingestion</b>	--
<b>Notes</b>	--

Substance:	d-limonene / (R)-p-mentha-1,8-diene		
CAS:	5989-27-5		
ORAL	INHALATION	DERMAL	NOTES
Rat LD50: > 2000 mg/kg bw	--	Rabbit LD50: 5000 mg/kg bw	--
The values included in this section are those available, at the time of writing this SDS, in the ECHA dossier in the section Toxicological information or from the supplier's indications.			
EXPOSURE AND HEALTH EFFECTS			
Routes of exposure	Inhalation, skin, eye, ingestion		
Inhalation risk	No indication can be given about the rate at which a harmful concentration of this substance in the air is reached on evaporation at 20°C.		
Effects of short-term exposure	The substance is irritating to the skin. The substance is mildly irritating to the eyes.		
Effects of long-term or repeated exposure	Repeated or prolonged contact may cause skin sensitization.		
SYMPTOMS BY SPECIFIC ROUTE OF EXPOSURE			
Inhalation	Slight irritation of the upper respiratory tract		
Skin	Redness. Pain.		
Eyes	Redness.		
Ingestion	If ingested, it can enter the respiratory tract with even lethal consequences.		
Notes	--		

<b>Substance:</b>	2,2,4,6,6-pentamethylheptane (INCI: Isododecane)		
<b>CAS:</b>	13475-82-6		
<b>ORAL</b>	<b>INHALATION</b>	<b>DERMAL</b>	<b>NOTES</b>
Rat LD50: 5 000 mg/kg bw	Rat LC50: 5 000 mg/m³ air	LD50 (rabbit) > 3.16 mL/Kg bw	--
The values included in this section are those available, at the time of writing this SDS, in the ECHA dossier in the section Toxicological information or from the supplier's indications.			

<b>Substance:</b>	Methyl anthranilate		
<b>CAS:</b>	134-20-3		
<b>ORAL</b>	<b>INHALATION</b>	<b>DERMAL</b>	<b>NOTES</b>
Rat DL50: 2800 mg/kg bw	--	Rabbit LD50: 5000 mg/kg bw	--
The values included in this section are those available, at the time of writing this SDS, in the ECHA dossier in the section Toxicological information or from the supplier's indications.			

Substance:	BHT			
CAS:	128-37-0			
ORAL		INHALATION	DERMAL	NOTES
Rat LD50: 6000 mg/kg bw		- -	Rat LD50: 2000 mg/kg bw	- -
The values included in this section are those available, at the time of writing this SDS, in the ECHA dossier in the section Toxicological information or from the supplier's indications.				
EXPOSURE & HEALTH EFFECTS				
Routes of exposure		The substance can be absorbed into the body by inhalation of its aerosol and by ingestion.		
Inhalation risk		A harmful contamination of the air will not or will only very slowly be reached on evaporation of this substance at 20°C.		
Effects of short-term exposure		The substance is irritating to the eyes and skin.		
Effects of long-term or repeated exposure		Repeated or prolonged contact with skin may cause dermatitis. The substance may have effects on the liver.		
ACUTE HAZARDS/SYMPTOMS				
Inhalation	Cough. Sore throat.			
Skin	Redness.			
Eyes	Redness. Pain.			
Ingestion	Abdominal pain. Confusion. Dizziness. Nausea. Vomiting.			
Notes	- -			

<b>Substance:</b>	trans-hex-2-en-1-ol/INCI: TRANS-2-HEXENOL

## 11.2 Information on other hazards

### 11.2.1 Endocrine disrupting properties

The mixture does NOT contain substances identified as having endocrine-disrupting properties in accordance with the criteria established in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations equal to or greater than 0.1% in weight.

### 11.2.2 Other information

No further data available

## SECTION 12: Ecological information

**Environmental Release Categories:** ERC11a - Widespread use of articles with low release (indoor)

### 12.1 Toxicity

The product is dangerous for the environment as it is harmful to aquatic organisms following acute exposure.

Use according to good working practices, avoiding to disperse the product in the environment.

<b>BCF</b>	102,3 l/kg ww – The substance is considered not bioaccumulative.		

#### 12.4 Mobility in soil

Data not available for the mixture.

#### Mobility information in soil specific to the substances contained

Substance:	Linalool; 3,7-dimethyl-1,6-octadien-3-ol; dl-linalool
CAS:	78-70-6
In accordance with column 2 of Annex VIII of the REACH Regulation, adsorption/desorption tests (both screening and further tests) are not necessary as the substance is expected to have low adsorption potential based on its log Kow low (<3) and the substance is easily biodegradable and therefore degrades rapidly in the environment.	
Substance:	d-limonene / (R)-p-mentha-1,8-diene
CAS:	5989-27-5
Log Koc: 3.383 (Koc: 2413 L/kg at 20°C)	

<div>Mr&amp;Mrs</div> <div>FRAGRANCE</div>	MATERIAL SAFETY DATA SHEET		MIO
	TUSCANY GRAPE		
Current revision date: 03/04/2024	Current revision number: 00	Previous revision date: --/--/----	Previous revision number: --

Substance:	2,2,4,6,6-pentamethylheptane (INCI: Isododecane)		
CAS:	13475-82-6		
The adsorption coefficient was calculated using Petrorsk. This substance is best represented by 2,2,4,6,6-pentamethylheptane from the Concawe Library (Compound ID - 1503). The log Koc of this substance is 4.91. The Koc of this substance is 8.13 x10^4.			
Substance:	Methyl anthranilate		
CAS:	134-20-3		
Koc at 20 °C: 75 [log Koc=1.87]			
Substance:	BHT		
CAS:	128-37-0		
Koc at 20 °C: 23 030 [= LogKoc : 4.362]			
Substance:	Reaction mass of 2-methylbutyl salicylate and pentyl salicylate – Amyl salicylate		
CAS:	- - EC: 911-280-7		
Koc at 20 °C: 5 012 [= logKoc: 3,7]			
Substance:	Linalyl acetate		
CAS:	115-95-7		
Log Koc = 2.6359 (Koc at 25 °C: 432.4 L/kg) based on this result, adsorption to the solid phase of the soil is not expected.			
Substance:	Geraniol / (2E)-3,7-dimethylocta-2,6-dien-1-ol		
CAS:	106-24-1		
A log Koc of 1.85 was calculated for the substance using SRC PCKOCWIN v1.66. The Koc log indicates that adsorption of the substance into soil and sediment is not expected.			
Substance:	Ethyl methylphenylglycidate / Ethyl 2,3-epoxy-3-phenylbutyrate		
CAS:	77-83-8		
Koc at 20 °C: 550 (LogKoc: 2.74)			
Substance:	Hexyl cinnamal / (2E)-2-(phenylmethylidene)octanal		
CAS:	165184-98-5		
Log Koc: 4.2 (Koc at 20°C: 15 800)			
Substance:	Nerol, 3,7-dimethylocta-2,6-dien-1-ol		
CAS:	106-25-2		
Koc at 20 °C: 143 (LogKoc: 2.155)			
Substance:	Neryl acetate		
CAS:	141-12-8		
Koc = 893 (Log Koc 2.95) at 20°C			
Substance:	Allyl caproate / Allyl hexanoate		
CAS:	123-68-2		
It is not necessary to determine the log Koc value as the substance and its degradation products are rapidly degraded in the environment.			

## 12.5 Results of PBT and vPvB assessment

The chemical safety report is not required for the mixture. However, based on the available data, the mixture does not contain PBT or vPvB substances in a percentage higher than 0.1 in accordance with Regulation 1907/2006, annex XIII.

## 12.6 Endocrine disrupting properties

The mixture does NOT contain substances identified as having endocrine-disrupting properties in accordance with the criteria established in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations equal to or greater than 0.1% in weight.

## 12.7 Other adverse effects

**Classification for water pollution in Germany (AwSV, vom 18. April 2017):** WGK 1: Slightly dangerous for waters

## SECTION 13: Disposal considerations

The substance/mixture shall not be removed through the sewerage system.

### 13.1 Waste treatment methods

#### Container material and type:

Glass / Plastic / Paper / Metal / Composite (identify the exact material from the symbols on the packaging).

#### Methods for waste treatment of the substance or mixture:

DANGER FEATURES (Directive 2008/98 / EC): HP 14 «Ecotoxic»  
 RECOVERY OPERATIONS (Directive 2008/98 / EC): R 13 Storage of waste pending any of the operations numbered R 1 to R 12  
 DISPOSAL OPERATIONS (Directive 2008/98 / EC): D13 - Blending or mixing prior to submission to any of the operations numbered D 1 to D 12  
 EER CODE : 16 03 05\* - organic wastes containing hazardous substances

#### Methods for handling any contaminated packaging:

DANGER FEATURES (Directive 2008/98 / EC): HP 14 «Ecotoxic»  
 RECOVERY OPERATIONS (Directive 2008/98 / EC): R 13 Storage of waste pending any of the operations numbered R 1 to R 12  
 DISPOSAL OPERATIONS (Directive 2008/98 / EC): D13 - Blending or mixing prior to submission to any of the operations numbered D 1 to D 12  
 EER CODE : 15 01 10\* packaging containing residues of or contaminated by hazardous substances

#### Physical / chemical properties that can affect waste treatment:

Since it is a "mirror" waste, the physical/chemical properties that can influence the treatment must necessarily be defined through analytical characterization, as they cannot be defined a priori through analysis of the production process.

#### Special precautions for recommended waste treatment:

The hazard characteristics, disposal and recovery operations and the suggested EWC codes refer to the product as it is without considering any changes due to use. It is therefore recommended, before disposal, to reclassify the waste, also evaluating its origin. Any mixing of different types of non-hazardous waste and any mixture of different hazardous waste is prohibited (Article 23 of Directive 2008/98 / EC). Disposal must be entrusted to an authorized waste treatment company, in compliance with national and possibly local regulations

## SECTION 14: Transport information

Not included in the scope of the regulations on the transport of dangerous goods: by road (ADR); by rail (RID); by air (ICAO / IATA); by sea (IMDG).

		ADR	IMDG	IATA

## SECTION 15: Regulatory information

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

**Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006** concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC.

**REGULATION (EC) No 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 16 December 2008** on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006.

**Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008** on waste and repealing certain Directives.

**Regulation (EU) No 528/2012 of the European Parliament and of the Council of 22 May 2012** concerning the making available on the market and use of biocidal products.

**Commission Delegated Regulation (EU) 2017/2100 of 4 September 2017** setting out scientific criteria for the determination of endocrine-disrupting properties pursuant to Regulation (EU) No 528/2012 of the European Parliament and Council.

**Commission Regulation (EU) No 1357/2014 of 18 December 2014** replacing Annex III to Directive 2008/98/EC of the European Parliament and of the Council on waste and repealing certain Directives

**COMMISSION DECISION of 18 December 2014** amending Decision 2000/532/EC on the list of waste pursuant to Directive 2008/98/EC of the European Parliament and of the Council

**REGULATION (EC) No 648/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 31 March 2004** on detergents

**Directive 2010/75/EU** of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control)

**Directive 2004/42/CE** of the European Parliament and of the Council of 21 April 2004 on the limitation of emissions of volatile organic compounds due to the use of organic solvents in certain paints and varnishes and vehicle refinishing products and amending Directive 1999/13/EC

**813.1** Federal Act of 15 December 2000 on Protection against Dangerous Substances and Preparations (Chemicals Act, Chema)

**813.11** Ordinance of 5 June 2015 on Protection against Dangerous Substances and Preparations (Chemicals Ordinance, ChemO)

**The mixture does not contain substances of very high concern (CANDIDATE LIST) as listed in Annex 3**

Basel Convention of 22 March 1989 on the Control of Transfrontier Movements of Hazardous Wastes and their Disposal 0.814.05

**814.20** Federal Act of 24 January 1991 on the Protection of Waters (Waters Protection Act, WPA)

**814.201** Waters Protection Ordinance of 28 October 1998 (WPO)

**814.01** Federal Act of 7 October 1983 on the Protection of the Environment (Environmental Protection Act, EPA)

**814.600** Ordinance of 4 December 2015 on the Avoidance and the Disposal of Waste (Waste Ordinance, ADWO)

**814.610.1** DETEC Ordinance on Lists for the Movement of Waste

**814.610** Ordinance on the Movement of Waste

**814.012** Ordinance of 27 February 1991 on Protection against Major Accidents (Major Accidents Ordinance, MAO)

**814.018** Ordinance of 12 November 1997 on the Incentive Tax on Volatile Organic Compounds (OVOC)

**DIRECTIVE 2012/18/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 4 July 2012** on the control of major-accident hazards involving dangerous substances, amending and subsequently repealing Council Directive 96/82/EC

**SEVESO category**

Not applicable

**Specified dangerous substances**

See section 3.2 for the presence of substances included in Annex I, part 2.

**Regulation (EU) 2019/1148** of the European Parliament and of the Council of 20 June 2019 on the marketing and use of explosives precursors, amending Regulation (EC) No 1907/2006 and repealing Regulation (EU) No 98/2013

The mixture does not contain an explosive precursor.

### 15.2 Chemical safety assessment

Chemical safety assessment for the mixture not foreseen. This safety data sheet contains one or more Exposure Scenarios in an integrated form. The content, where relevant, has been included in sections 1.2, 8, 9, 12, 15 and 16 of the same safety data sheet

## SECTION 16: Other information

### 16.1 Indication of any points of the SDS that have been revised

### 16.3 Full text of the Classification Information set out in Section 3

Description of the hazard class and category codes set out in section 3	Description of the hazard statements set out in section 3
Skin Irrit. 2 - Skin corrosion/irritation, Hazard Category 2	H315 - Causes skin irritation
Skin. Sens. 1B - Sensitisation — Skin, hazard category 1B	H317 - May cause an allergic skin reaction.
Eye Irrit. 2 - Serious eye damage/eye irritation, Hazard Category 2	H319 - Causes serious eye irritation
Flam. Liq. 3 - Flammable liquids, Hazard Category 3	H226 - Flammable liquid and vapour.
Asp. Tox. 1 - Aspiration hazard, Hazard Category 1	H304 - May be fatal if swallowed and enters airways.

<div>Mr&amp;Mrs</div> <div>FRAGRANCE</div>	MATERIAL SAFETY DATA SHEET		MIO
	TUSCANY GRAPE		
Current revision date: 03/04/2024	Current revision number: 00	Previous revision date: --/--/----	Previous revision number: --

Aquatic Acute 1 - Hazardous to the aquatic environment -AcuteHazard, Category 1  
 Aquatic Chronic 3 - Hazardous to the aquatic environment — Chronic Hazard, Category 3  
 Aquatic Chronic 4 - Hazardous to the aquatic environment — Chronic Hazard, Category 4  
 Aquatic Chronic 1 - Hazardous to the aquatic environment — Chronic Hazard, Category 1  
 Skin Corr. 1B - Skin corrosion/irritation, Hazard Category 1, Sub-Categories 1B  
 Eye Dam. 1 - Serious eye damage/eye irritation, Hazard Category 1  
 Acute Tox. 4 - Acute toxicity (oral), Hazard Category 4  
 Skin. Sens. 1 - Sensitisation — Skin, hazard category 1  
 Aquatic Chronic 2 - Hazardous to the aquatic environment — Chronic Hazard, Category 2  
 Acute Tox. 3 - Acute toxicity (oral), Hazard Category 3  
 Acute Tox. 3 - Acute toxicity (dermal), Hazard Category 3  
 Acute Tox. 3 - Acute toxicity (inhal.), Hazard Category 3

H400 - Very toxic to aquatic life  
 H412 - May cause long lasting harmful effects to aquatic life.  
 H413 - May cause long lasting harmful effects to aquatic life.  
 H410 - Very toxic to aquatic life with long lasting effects.  
 H314 - Causes severe skin burns and eye damage  
 H318 - Causes serious eye damage.  
 H302 - Harmful if swallowed.  
 H317 - May cause an allergic skin reaction.  
 H411 - Toxic to aquatic life with long lasting effects.  
 H301 - Toxic if swallowed.  
 H311 - Toxic in contact with skin.  
 H331 - Toxic if inhaled.

### Additional hazard statements set out in section 3

EUH066 - Repeated exposure may cause skin dryness or cracking

**M-Factor** Means a multiplying factor. It is applied to the concentration of a substance classified as hazardous to the aquatic environment acute category 1 or chronic category 1.

**16.7 Any appropriate training courses for workers in order to ensure the protection of human health and the environment**

- Training course on the management and interpretation of the SDS
- Training on the use of PPE

**More information**

Safety Data Sheet compliant with regulation (EU) n. 2020/878 of 18 June 2020

This document has been drawn up by a competent SDS technician who has received adequate training and is certified according to the reference practice UNI / PdR 60: 2019. Certificate issued by INTERTEK ITALIA S.p.A. Registration number: RSDS2020-00162 exp. 28-May 2025

The information in this safety data sheet has been obtained from the best available or known to us on the market at the revision date indicated. Neither the company holding this sheet nor its subsidiaries will be able to accept complaints arising from improper use of the information indicated here or from improper use in applying the product. Pay particular attention to the use of preparations because improper use can increase their danger.
